

INTRODUCTION

WHAT IS THE PORT HANEY MULTI-USE PATHWAY

CONTEXT MAP

The City acquired the former log sort site adjacent to the Fraser River in 2021. This waterfront site is approximately 5 acres of linear waterfront property in the Port Haney area of Maple Ridge, bounded by the CP rail tracks and Haney Bypass to the north and the Fraser River to the south.

This concept plan shows the planned multi-use pathway connection between the Port Haney Wharf and Kanaka Creek Regional Park. This pathway alignment will form part of the “Experience the Fraser” route. The Experience the Fraser project was developed by Metro Vancouver and Fraser Valley Regional District and their federation municipalities in 2010 to see a network of multi-modal trails developed along the Fraser River from the Salish Sea to Hope.

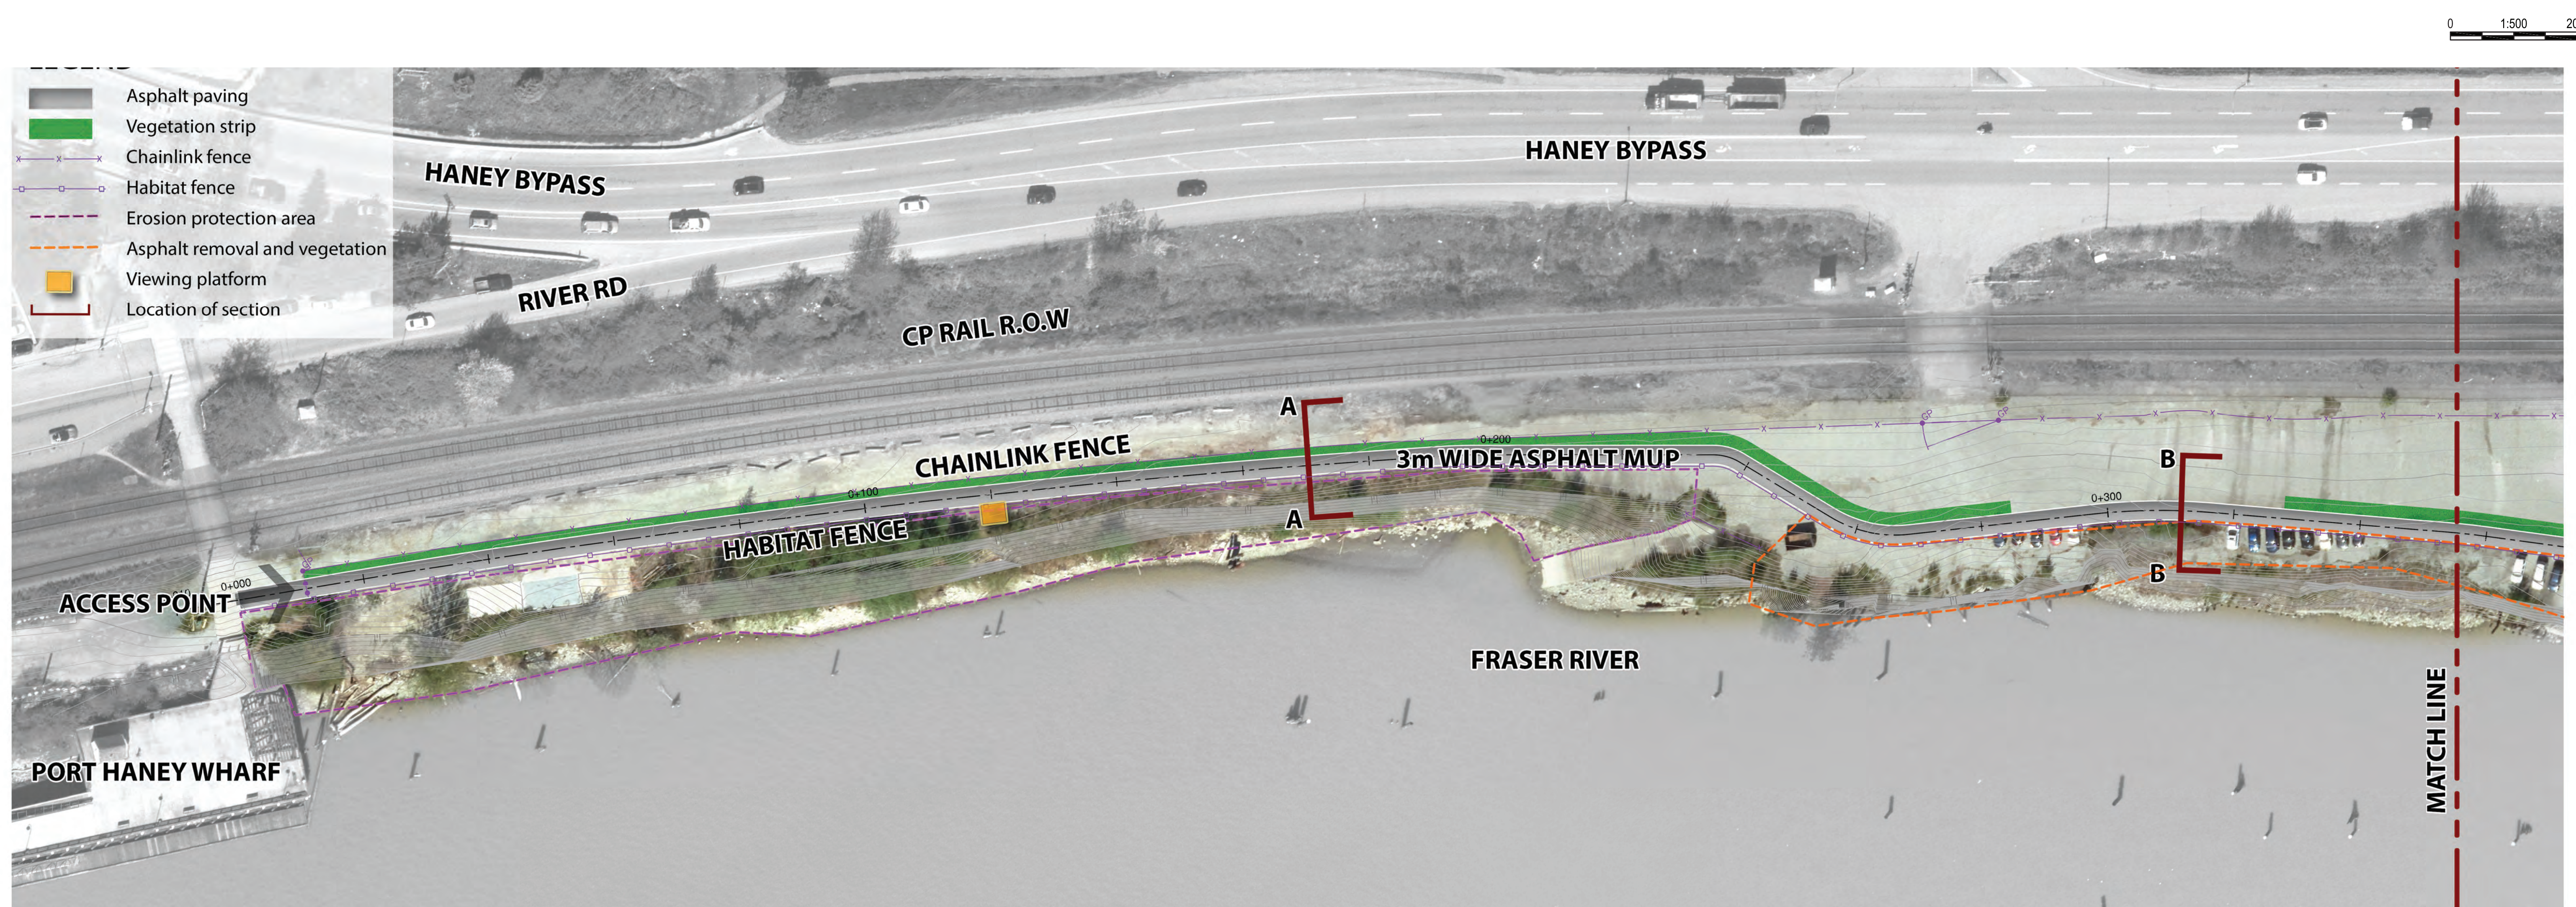

This project builds on the vision to increase access to the Fraser River waterfront and offer a new active transportation route along the waterfront.

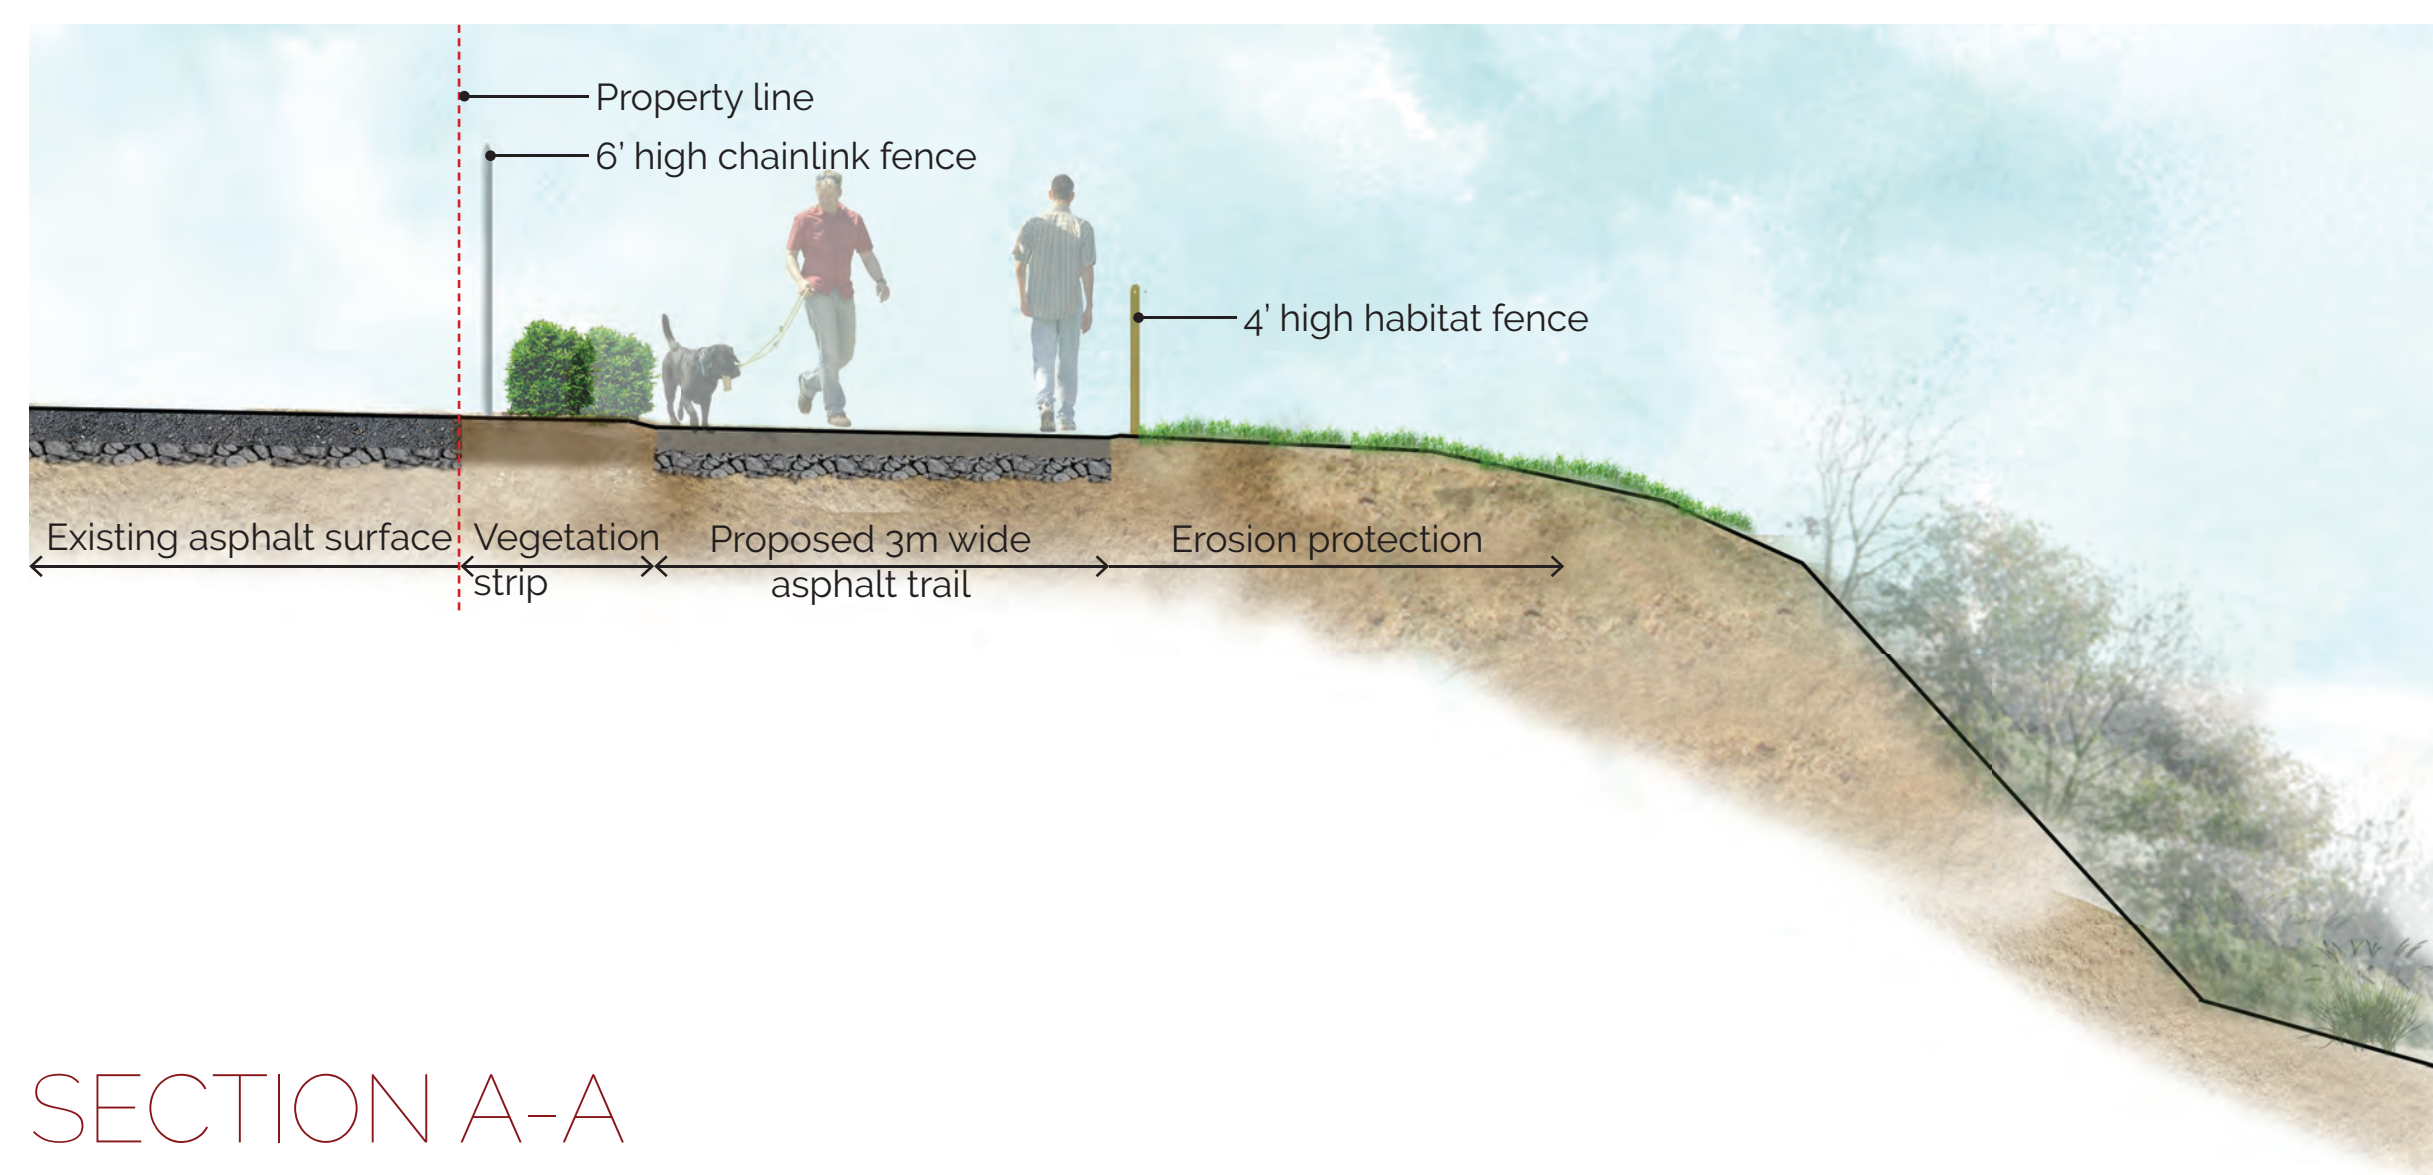

KEY PLAN

PROPOSED ALIGNMENT

DESIGN RESPONSES

TRAIL ALIGNMENT

SECTION A-A

Design Responses

Connections

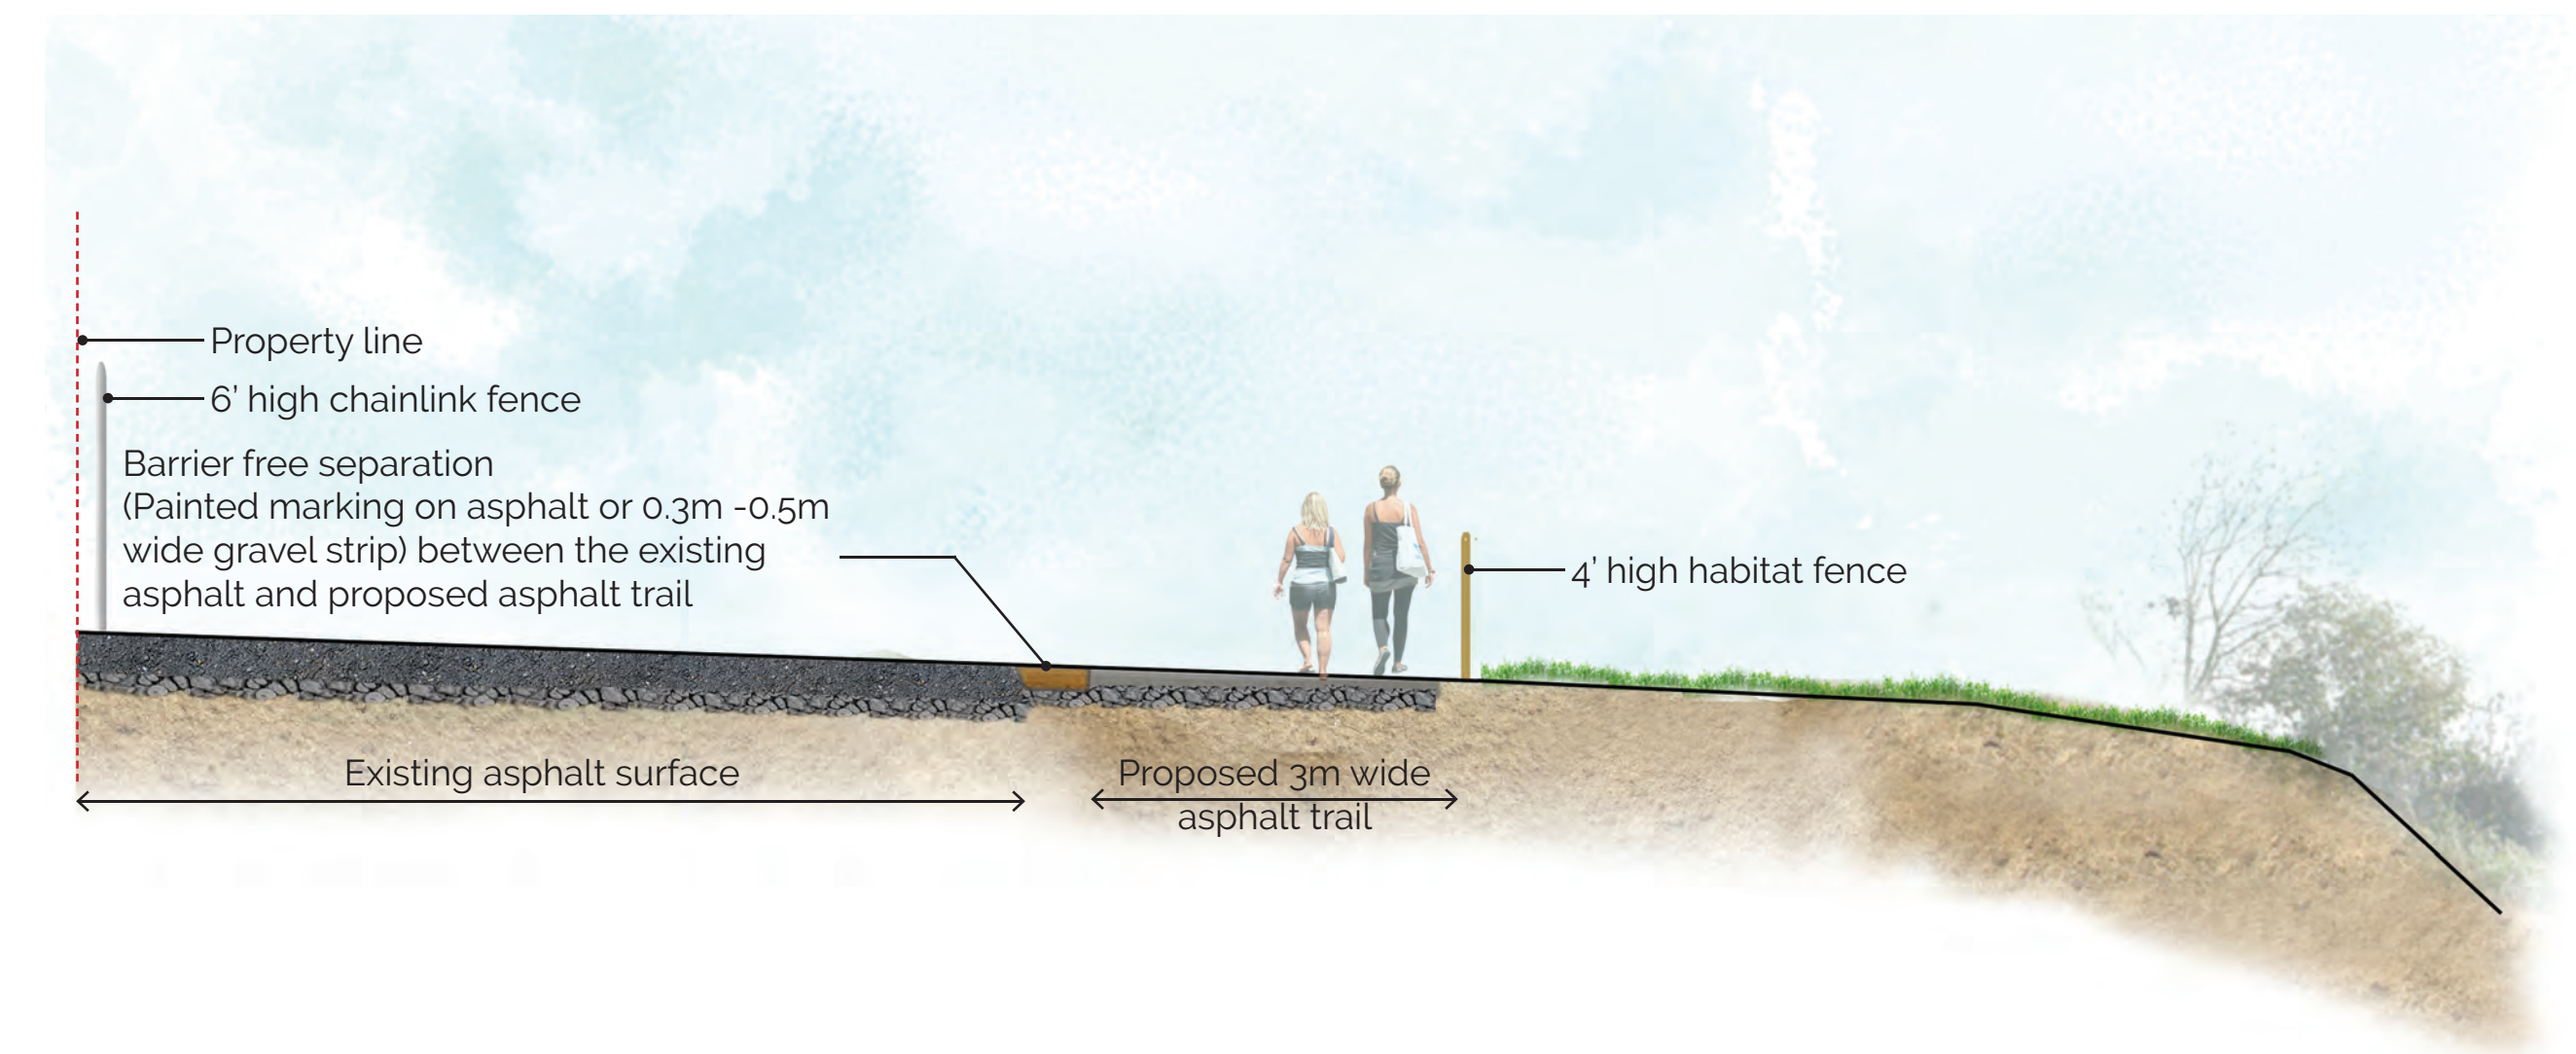

An accessible multi-modal connection from Port Haney Wharf to Kanaka Regional Park.

Habitat Enhancements

Habitat fencing will help control damage to the natural habitats.

Viewpoints

View decks provide opportunities to rest and enjoy the natural settings around the trail including the view of the Fraser River.
