

CONCEPT 1: SALMON RUN

PERSPECTIVE

SITE PLAN

LEGEND

Proposed Play Equipment

- 1 Double Play Tower with Slide
- 2 Group Spinner
- 3 Linear Net Climber
- 4 Toddler Swingset
- 5 Bear Play House
- 6 Sand Play
- 7 Stepping Stumps through Planting Bed
- 8 In-Ground Trampolines
- 9 Climbing Boulders
- 10 Zipline

Retained Play Equipment

- A Main Play Structure
- B Climbing Boulder
- C 3-Bay Swingset

THEMES

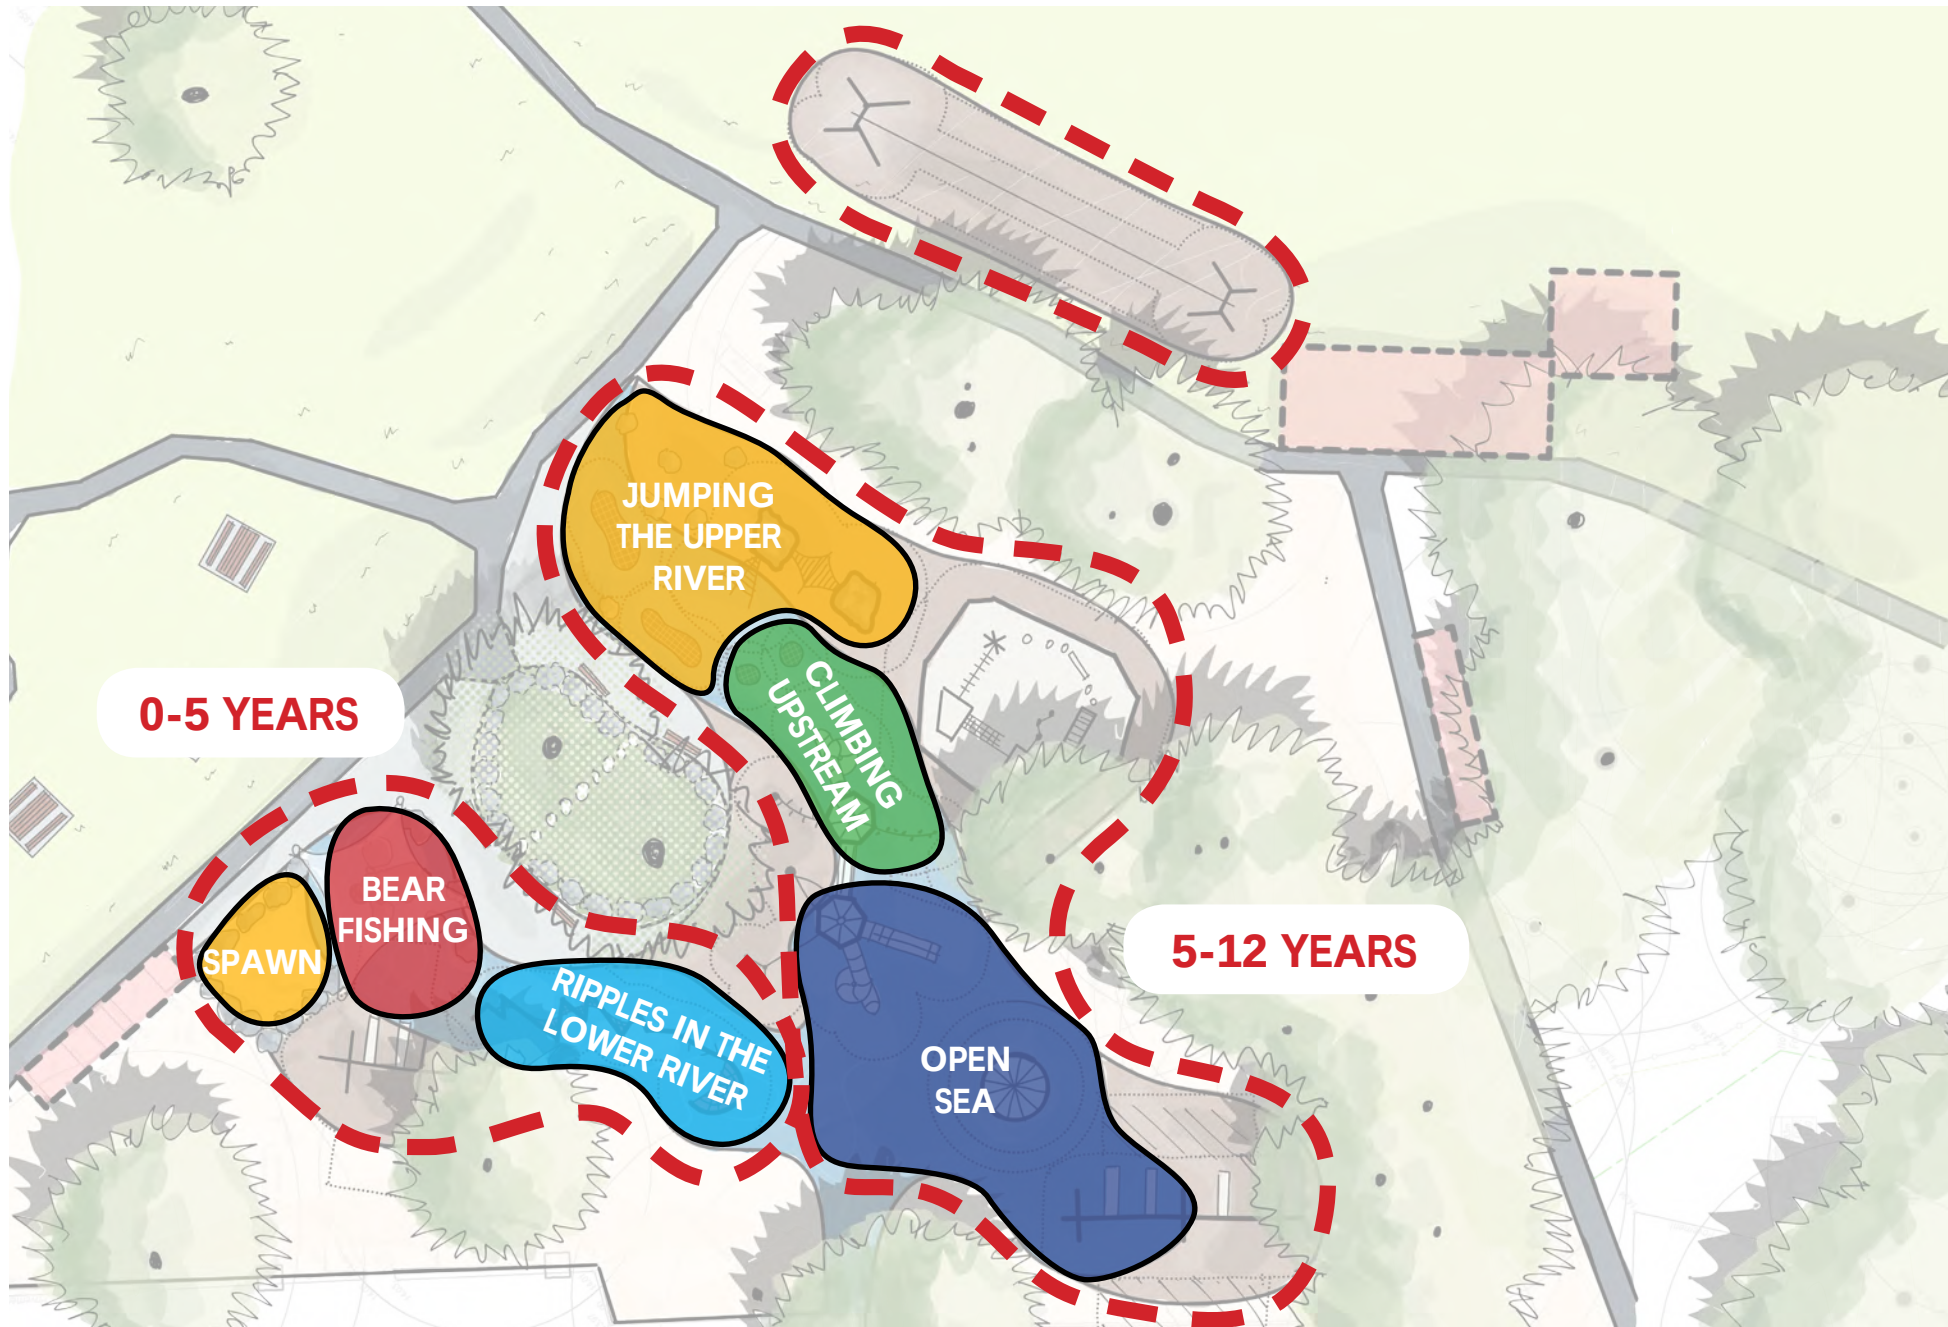

CONCEPT

With each fall comes the Salmon Run. A grand migration where salmon swim upstream from the ocean to return to their original birthplace in the upper reaches of the river. There they spawn in the gravel beds before passing on, leaving the next generation to hatch and start the life cycle over again.

This playground creates play spaces around the rivers that connect to the ocean. The toddlerspace includes the 'spawning grounds' in the sandbox, 'rapids' for the bear to fish and a structure to play around, and net climber in the lower 'ripples' river leading to the ocean.

Down in the open sea there is the larger group spinner and swing set. Moving upstream in the 5-12 years old play area a multi-tower structure provides climbing and sliding opportunities and upper rapids, where the children jump up river on trampolines, and swing on a zip-line.

Thematic Layout
